Monique, it looks like there may be a labelling error. I was looking to see the distance from the SWD to our 2 monitoring wells, and while I was able to find PGMW01, the well that appears to be in the right location to be our second well, PGMW02 is actually labelled PGMW03. Since we only have 2 monitoring wells, I am guessing that MW02 was incorrectly labelled as MW03. Does that make sense? Am I missing something?
